## HW #2: IRB Certification for Ethical Treatment of Human Subjects

Individual Assignment, due on Sunday of Week 3

**Motivations:** User interface professionals often conduct empirical studies with human subjects, and most institutions require you to be trained in ethical treatment of human subjects in order to do this. In fact, OSU requires you to be trained if you conduct such studies for research purposes.

**Objectives:** Complete a basic human subjects research certification form, and be able to describe basics of human subject research ethics.

**For course learning objectives:** 3 and 4.

**Directions:** Take the IRB tutorial at the [NIH IRB training site](http://phrp.nihtraining.com/users/login.php) (<http://phrp.nihtraining.com/users/login.php>).

It's a tutorial with small quizzes at the end of each chapter. After you have passed the test, click on "get your certificate" and save the certificate as a pdf file. If unable to do so, you can create a screen-shot of the certificate (which is usually a pdf).

*Note:* When you register and log in, it's best to use your OSU email address. This may save you steps later, if you need to use your certification in the future.

**Turn in:** The pdf file.

**Grading:**

Not graded. 10 points for submitting the certificate.
